ANSHM Industry Forum – Open Discussion

Nigel Powers - Manager Operations South Western Victoria
- President IABMAS Australia

keeping victorians connected

The Challenge!

- Limited Funding
- Limited Resources
- Low Capability
- The network being pushed to its limits

- Low level understanding of SHM and its benefits
- Low level acceptance of SHM

- Better understand condition
- Better understand risk
- Quick and accurate assessment

How can ANSHM and SHM in general help address these challenges?

Will the new AS5100 Part 7 – Bridge Assessment help? What impact will it have on the industry?

Why hasn’t SHM been more broadly accepted by the industry and asset owners in Australia?

How can SHM become more broadly accepted and used by asset owners? What is ANSHM’s role in this?

My vision

- All of industry work together
  - Academics
  - Practitioners
  - Suppliers

- Systems
  - Simple
  - Quick
  - Effective
  - Resilient
